

YOUR VISION, YOUR DESIGN, YOUR YEARBOOK

Automatically Flow Portraits and Names onto Yearbook Pages in Seconds!
Let your creativity be your guide...the possibilities are endless!

Create Your Book in 3 Easy Steps

1 IMPORT
Candid Images

2 LAYOUT
Candid Pages

3 FLOW
Portrait Pages

ezbook™ enables students, advisors and volunteers to assemble yearbooks on a computer without years of publishing experience!

EZBook AUTOMATICALLY FLOWS portraits and names onto yearbook pages in seconds!

EZBook makes assembling a professional looking yearbook truly quick and easy.

EZBook has eliminated the “page setup” process. Start building a yearbook from the moment you start the program (you can begin the first day of school even BEFORE you receive your portrait CD from your photographer). EZBook enables you to create high quality, professional books without any desktop publishing experience. All the printing expertise you need is built into the program!

Simple tools build your book! EZBook is both fast and easy to use. EZBook is flexible, allowing you to use photos from your photographer and candid shots from volunteers. Resize, rotate, crop, frame your photos – EZBook does it all. Create portrait pages, candid pages, even montage pages using EZBook. No need to spend endless hours learning complex programs like Quark or InDesign. EZBook includes AUTOFLOW technology which is

not available in other programs. You can produce a portrait page in seconds! EZBook tools are simple and the book you produce looks fantastic!

EZBook is FREE! EZBook won't cost you one penny if you publish with us. You can use it FREE! Quark sells for around \$900, and InDesign sells for around \$700. You save a lot of money just in software alone, however the savings don't end with the software because of the efficiencies of EZBook. EZBook allows amazing pricing for yearbooks (some EZBooks are published for half the price of a comparable book from other publishing plans)!

What could make this better? How about top quality customer service and technical support? You'll receive the best customer service, hands down! The caring customer service staff always goes the extra mile to make sure you get the book you want! The EZBook technical support team is knowledgeable and friendly - a helpful live person ready to give you answers to questions.

What's so special about EZBook? It's quick and easy to use, plus you save time and money when producing your yearbook.

Compatible

The EZBook installation CD has a built in security certificate. This tells your school's network security that the EZBook software is safe to download onto your school's network. No need to bother the school IT person to install EZBook!

Free Software

EZBook is free when you publish your yearbook with us. Printing black and white or full-color yearbooks is hassle and headache free! It's a yearbook advisor's dream come true!

Free Kit Resources

EZBook comes with everything you need to help organize your yearbook.

Success Without Surprises

Our production staff backs up EZBook's automated error checking with proof reviews. Every export file is versioned to match the final export printout.

ezbook™ will give every other yearbook plan an inferiority complex!

WHY EZBOOK?

1. Complete control over the entire layout process, including portrait photos and names.
2. Complete control of student information to permit name changes, movement between classes, and addition or deletion of students.
3. Unlimited number of pages and images.
4. Immediate and unlimited control of printing proofs displaying everything that will appear on the page.
5. All pages can bleed, including most stock artwork, custom backgrounds, and montage pages.
6. Powerful design features rival the most sophisticated and expensive layout programs.
7. Friendliest yearbook submission schedule and customer service support.

EZBook is Easy to Use EZBook is a publishing revolution! No need for expensive, complicated programs such as QuarkXPress or Adobe InDesign. EZBook gives you exactly what you need for assembling a digital yearbook without a steep learning curve. It's ideal for anyone with basic computer skills. EZBook is also built to be compatible with most PC computers and peripherals and Macintosh computers operating in OSX 10.4 or higher.

Save Money Submit your yearbook as a digital document and get the lowest possible publishing cost! EZBook's unique page assembly options allow multiple classes on a page. Maximize every page layout and reduce the number of pages you need! EZBook software is provided free when you choose the EZBook publishing plan.

Save Time Assemble portrait pages quickly and easily with pictures and data from a portrait CD. Automatically alphabetize and organize by class or grade. The personal information editor helps to easily update student or staff information. Import pictures from a professional photo CD, digital camera or from images you have scanned. Create montages right in the program! Save valuable volunteer hours!

Reduce Errors Student names are imported from your portrait CD database, so you won't have to retype them. Easily edit personal data to correct misspellings and change names. EZBook is designed to minimize errors common to digital publishing. The program automatically stores all of the necessary data to publish the yearbook so it can't be accidentally forgotten. Spell check will automatically underline misspelled words and allow you to choose from a list of options or add the word to your dictionary.

Design Your Own Page Styles Use the Portrait Flow Wizard to choose the configuration of your portrait blocks. EZBook will automatically flow the portraits for you. Drag and drop candid images anywhere on the page. Be as creative as you want! Use

the page templates as a guide for your candid images, or create a unique design. It's super quick and easy to do! Add your own clip art or choose from the stock EZBook clip art library. Add professionally designed backgrounds, borders or page elements to any of the pages! EZBook includes an extensive artwork library.

Fantastic Font and Text Options Choose from a large selection of furnished fonts. Easy text placement and sizing. Spell check included.

Photographer Friendly EZBook works with standard RGB JPEG file format images as well as RGB TIFF images when a PC platform is used. These are two of the most widely used picture formats for digital cameras and scanners. Only RGB JPEG images may be used with the MAC platform. JPEG format is recommended for fastest processing.

Multiple Users An unlimited number of people can create pages at the same time. Install EZBook on more than one computer using the Master/Satellite feature included in EZBook. Work from home and school.

Superior Support You are never alone when doing an EZBook. Our friendly, knowledgeable technical support is just a phone call or email away.
