Chemical Waste Generator Statement

Return to: Trade Exhibit Services Department, PMA, 3000 Picture Place, Jackson, MI 49201 USA • Fax: 517-788-8371

To be completed by all firms that will produce spent chemistry and contaminated wastewater as a result of their product demonstrations.
DEADLINE FOR RETURN: **December 8, 2009**

PLEASE NOTE: Faxed and handwritten forms are not always legible. PLEASE TYPE OR PRINT.

Because photographic processing effluents are classified by the USEPA as hazardous materials, they can only be removed from the PMA Trade Show to a properly licensed and permitted Treatment, Storage and Disposal Facility (TSDF), under an EPA hazardous waste manifest. Exhibitors who will generate spent chemistry and wastewater from their product demonstrations must notify PMA of their planned outputs with a Generator Statement and MSDS forms, as a first step in arranging authorized chemical disposal.

To keep product demonstrations environmentally safe; simplify exhibitor compliance; and provide for responsive, cost-effective removal service, PMA Trade Show Photographic Waste Guidelines have been developed. The Guidelines, plus complete information for ordering waste management services, will be supplied to exhibitors upon PMA receipt of this Generator Statement.

IMPORTANT:
Under no circumstances may exhibitors dispose of chemical wastes in sewer drains, dump them on the floor or ground, abandon them as trash, transport them from the booth themselves, conceal them inside outbound freight, or ship them on a carrier not licensed for chemical waste. No chemical containers may be brought into any of the lavatories, kitchens, or janitor closets of the Anaheim Convention Center; such areas will be closely monitored for environmental violations. Damages, fines, and costs of cleanup will be the sole responsibility of the exhibitor in incidents of spill or unauthorized disposal.

NOTIFICATION:
We hereby notify PMA that our firm will generate certain chemical wastes in our exhibit.

We (☐ attach/☐ will provide under separate cover by December 8, 2009) Material Safety Data Sheets identifying all of our waste products.

We will supply an EPA Generator Identification number, in our own company name, that will apply specifically to the site of our exhibit. (The guidelines will contain requirements and sources of assistance.)

We will make certain that only trained and authorized company personnel will handle the above materials within our exhibit space and that we are properly insured for all risks.

We agree to comply with all local, state, and federal laws and regulations governing chemical waste and with Anaheim Convention Center operating rules and regulations. We will comply with PMA Trade Show Photographic Waste guidelines. We understand that PMA will have the right to terminate, without liability of any kind, the processing activities of any exhibitor who fails, after notice, to conform to official waste rules and regulations of the PMA Show.
